EXPERIMENT - 13

Phishing Attack Study Using Z-Phisher (Simple Steps)

Step 1: Start Environment

Open Oracle VirtualBox and start Kali Linux.

Step 2: Study Tool

Refer to the Z-Phisher framework on GitHub and understand its features.

Step 3: Analyze Workflow

Study how phishing pages imitate real websites and trick users into entering credentials.

Step 4: Simulated Demonstration

Observe phishing page behavior using a safe, consent-based simulation with dummy data.

Step 5: Identify Risks and Prevention

Understand risks like credential theft and learn prevention methods such as user awareness, HTTPS verification, and two-factor authentication.

Output

Understanding of phishing techniques and social-engineering risks.
